A Software Architecture for Device Management in Instrumented Environments

Christoph Endres
endres@cs.uni-sb.de
Saarland University
Germany

Project FLUIDUM:
www.fluidum.org

FLUIDUM project:
• Building different scales of IEs
• Research on UI and interaction metaphors
My task:
• Providing infrastructure for device orchestration

My thesis issues:
• Device modeling
• Reliably matching devices and services
• How to deal with the dynamics of the environment
