To strengthen our dedicated team in the research department Institute for Information Systems in Saarbrücken we are looking for a

**Research Assistant (m/f/d)**

(Development of research prototypes)

The Institute for Information Systems at the DFKI employs more than 60 people in the field of applied research under the scientific supervision of Prof. Dr. Peter Loos. The research and teaching comprises of information and process management in industry, services and administration. Of particular importance is the transfer of technology from science to practice.

Your tasks:

- Development and implementation of prototypes in Python with several libraries like Tensorflow and Keras.
- Development of Solutions in the area of machine learning and Computer Vision.

Your qualifications:

- A minimum of 4 semesters remaining in Saarbrücken.
- Good knowledge of the English language.
- Experience or high interest in the above mentioned topics and technologies.
- To be capable of independent work and display initiative.

Your benefits:

- The chance to work in interdisciplinary research projects at the interface between business and computer science.
- Flexible work hours.
- An innovative, agile and professional work environment at one of the leading locations for computer science in Germany.

We look forward to receiving your informative application documents and your earliest possible starting date up to 31.08.2019.

Please contact Peter Pfeiffer for further information and send your application via E-Mail to Peter.Pfeiffer@dfki.de.
