The German Research Center for Artificial Intelligence (DFKI) is one of the world's leading institutions for research and innovation in the field of Artificial Intelligence. With our more than 1000 employees at 6 locations in Germany, we work together with our university and industrial partners on solutions for the intelligent society of tomorrow. Founded in 1988 as a non-profit research organization organized under private law, DFKI conducts publicly and privately financed, time-limited research and innovation projects in the volume of currently significantly more than € 50 million per year. The shareholders of DFKI include several DAX-listed companies and global IT companies.

Per January 1st, 2020 we are looking for a

Chief Financial Officer (m/f/d)

Your tasks:

» Leadership, coordination and resource planning of the administrative and commercial area of the DFKI with several departments
» Responsibility for all financial and business matters
» Legal processing of grants from various funding agencies in Germany and abroad as well as ensuring sustainable funding regulations in conjunction with other research institutions
» Management, coordination and co-responsibility of the monthly and annual financial statements as well as budget planning
» Contract and risk management as well as compliance
» Supervision of construction projects
» Digitization, organizational development and process optimization
» Representations of the company among shareholders, companies, research institutions, banks and authorities

Your profile:

» Successfully completed business studies
» Several years of practical experience from a comparable commercial management function, ideally from a mixed funded research institution and the above mentioned tasks
» Profound know-how in finance and controlling, especially in public procurement law
» Final security according to HGB

The German Research Center for Artificial Intelligence (DFKI) is Germany's leading business-oriented research institution in the field of innovative software technologies based on artificial intelligence methods. In the international scientific community, DFKI ranks among the most recognized "Centers of Excellence" and currently is the biggest research center worldwide in the area of Artificial Intelligence and its application in terms of number of employees and the volume of external funds. The DFKI cooperates closely with national and international companies.

 Severely disabled applicants and peers are given special consideration if they are equally suitable. The DFKI intends to increase the share of women in the field of science and therefore urges women to apply.
