To strengthen our dedicated team in the research department Smart Enterprise Engineering in Osnabrück we are looking for

three RESEARCHER / SENIOR RESEARCHER (m/f/d)
(full-time, initially limited to 2 years)

The research department Smart Enterprise Engineering, headed by Prof. Dr. Oliver Thomas, researches digital business models for the company of the future. All projects are application-oriented and are developed in close cooperation with large international corporations as well as with “hidden champions” and SMEs.

Your tasks:
≫ Development and application of innovative methods and tools for the design and application of Smart Products, Smart Services and Smart Systems.
≫ Collaboration in the acquisition and implementation of national and international research and development projects (BMBF, EU, etc.) in the areas of Smart Home, Smart Factory and Smart Logistics
≫ Development of data-driven value creation mechanisms

Your qualifications:
≫ Good knowledge in at least one of the following areas: Software Development, Machine Learning, Deep Learning, Cloud Solutions, Distributed and Autonomous Systems, Mixed Reality
≫ Above-average degree in Business Informatics, Computer Science, Business Administration, Industrial Engineering, Cognitive Science or related subjects (Master or equivalent)
≫ Completed PhD in a relevant field of research and experience in the acquisition and accomplishment of third-party funded projects (applies to a position as senior researcher)
≫ Good command of English
≫ Enjoy working in a dynamically growing team

Your benefits:
≫ Excellent industrial contacts
≫ Excellent equipment
≫ An innovative, agile and professional working environment

We look forward to receiving your informative application documents (curriculum vitae, certificates and other important documents) and your earliest possible starting date. Please send your application via E-Mail to Prof. Dr. Oliver Thomas (smart-enterprise@dfki.de).

The German Research Center for Artificial Intelligence (DFKI) is Germany’s leading business-oriented research institution in the field of innovative software technologies based on artificial intelligence methods. In the international scientific community, DFKI ranks among the most recognized “Centers of Excellence” and currently is the biggest research center worldwide in the area of Artificial Intelligence and its application in terms of number of employees and the volume of external funds. The DFKI cooperates closely with national and international companies.

Severely disabled applicants and peers are given special consideration if they are equally suitable. The DFKI intends to increase the share of women in the field of science and therefore urges women to apply.
