To strengthen our dedicated team in the research department Smart Enterprise Engineering in Osnabrück we are looking for

one RESEARCHER / SENIOR RESEARCHER (m/f/d)  
(full-time, initially limited to 2 years)

The research department Smart Enterprise Engineering, headed by Prof. Dr. Oliver Thomas, researches digital business models for the company of the future. All projects are application-oriented and are developed in close cooperation with large international corporations as well as with “hidden champions” and SMEs.

Your tasks:

> Development and application of innovative methods and tools for the design and application of audit-specific cloud services, blockchain technologies, and intelligent data analytics tools.
> Collaboration in the acquisition and implementation of national and international research and development projects (BMBF, EU, etc.) in the areas of cloud- and AI-based legal assurance, auditing, and tax
> Development of data-driven auditing and consultant services

Your qualifications:

> Good knowledge in at least one of the following areas: Audit Analytics, Machine Learning, Cloud Solutions, Distributed and Autonomous Systems, Software Development, Legal Assurance, Auditing, and Tax
> Above-average degree in Business Informatics, Computer Science, Business Administration, Industrial Engineering, Cognitive Science or related subjects (Master or equivalent)
> Completed PhD in a relevant field of research and experience in the acquisition and accomplishment of third-party funded projects (applies to a position as senior researcher)
> Very good command of English
> Enjoy working in a dynamically growing team

Your benefits:

> Excellent industrial contacts
> Excellent equipment
> The possibility of a doctorate or habilitation is given
> An innovative, agile and professional working environment

We look forward to receiving your informative application documents including your earliest possible starting date as well as curriculum vitae, certificates and other documents. Please send your application via E-Mail to Prof. Dr. Oliver Thomas (smart-enterprise@dfki.de).

The German Research Center for Artificial Intelligence (DFKI) is Germany’s leading business-oriented research institution in the field of innovative software technologies based on artificial intelligence methods. In the international scientific community, DFKI ranks among the most recognized “Centers of Excellence” and currently is the biggest research center worldwide in the area of Artificial Intelligence and its application in terms of number of employees and the volume of external funds. The DFKI cooperates closely with national and international companies.

Severely disabled applicants and peers are given special consideration if they are equally suitable. The DFKI intends to increase the share of women in the field of science and therefore urges women to apply.
