To enhance our highly motivated, international team, the Educational Technology Lab located in Berlin is looking for

(Senior) Researcher (f,m,x)
full-time, limited to October 2024

The Educational Technology Lab, headed by Prof. Dr. Niels Pinkwart aims to support training, qualification and educational processes in (continuing) education and professional development for school, academia and professionals by applying Artificial Intelligence and innovative software technologies.

Your tasks:

- Support for accompanying research within the framework of a large funding program on standards for an innovative digital vocational education space
- Conduct systematic reporting of different technical standards and AI methods of digital education services and platforms
- Presentation of best practice case studies
- Scientific publishing and presentation of research results
- Exchange knowledge and networking with projects, project partners and persons responsible for the funding program
- Support in the organization and implementation of events

Your qualifications:

- Master’s degree in Computer Science or similar qualification
- For senior researcher position: completed PhD as well as experience in implementation of R&D projects
- Proven experience in:
  - Data and technology standards regarding interoperability and learning analytics,
  - Adaptivity and personalization methods for diagnostics,
  - Interface methods for platform adaptivity.
- Ability to effectively communicate project and research results in a service-oriented manner (German and English).
- Ability to communicate project and research results effectively and in a service-oriented manner (German and English).
- Experience in international scientific publishing

Your benefits:

- Challenging and diverse tasks in an international team
- An innovative, agile and professional working environment at one of Germany’s highest ranked computer science institutions

Please send your digital application (preferably until April 11, 2021) to Dr. Berit Blanc (Berit.Blanc@dfki.de).

The German Research Center for Artificial Intelligence (DFKI) is Germany’s leading business-oriented research institution in the field of innovative software technologies based on artificial intelligence methods. In the international scientific community, DFKI ranks among the most recognized “Centers of Excellence” and currently is the biggest research center worldwide in the area of Artificial Intelligence and its application in terms of number of employees and the volume of external funds. The DFKI cooperates closely with national and international companies.

Severely disabled applicants and peers are given special consideration if they are equally suitable. The DFKI intends to increase the share of women in the field of science and therefore urges women to apply.
