To strengthen our dedicated team in the research department Cognitive Assistants in Berlin we are looking for a

**Researcher (m/f/d)**

*(full-time, initially limited to 3 years)*

The research department Cognitive Assistants, headed by Prof. Dr. Antonio Krüger develops the basics for multi-modal human-computer interaction and personalized dialogue systems integrating speech, gestures, and facial expressions with physical interaction.

Your tasks:

- Research and integration of interactive AI methods in a social learning environment
- Conceptual design and exemplary implementation of search, prediction and chatbot functions

Your qualifications:

- Master in Computer Science or a subject with significant computer science components with focus on AI
- Knowledge of one or more relevant subject areas such as chatbots, intelligent interactive search, and machine learning, or the willingness to quickly become self-employed
- Proficiency in software development, e.g. in Java or Python, as well as experience with the corresponding toolchains
- Very good language skills in German and English
- Enjoy working in a dynamically growing team

Your benefits:

- The opportunity to participate in interdisciplinary projects in the field of AI with a focus on interaction
- Excellent contacts to industry
- An innovative, agile and professional working environment
- If suitable, the possibility of preparing a doctorate

We look forward to receiving your informative application documents and your earliest possible starting date.

Please send your application via E-Mail to Prof. Dr. Antonio Krüger (Antonio.Krueger@dfki.de). For questions regarding content please contact Dr. Norbert Reithinger (norbert.reithinger@dfki.de).

---

The German Research Center for Artificial Intelligence (DFKI) is Germany’s leading business-oriented research institution in the field of innovative software technologies based on artificial intelligence methods. In the international scientific community, DFKI ranks among the most recognized “Centers of Excellence” and currently is the biggest research center worldwide in the area of Artificial Intelligence and its application in terms of number of employees and the volume of external funds. The DFKI cooperates closely with national and international companies.

Severely disabled applicants and peers are given special consideration if they are equally suitable. The DFKI intends to increase the share of women in the field of science and therefore urges women to apply.
