To strengthen our dedicated team in the research field Intelligent Analytics for Massive Data (IAM) under the direction of Prof. Dr. Volker Markl at DFKI Berlin, we are looking for a

**Senior Project Manager (m/w/d)**

(full-time, initially limited to 2 years)

The IAM group conducts research in collaboration with leading research and industry partners on new data analytics technologies and tools.

Your tasks:

- Acquisition and management of national and international research projects as well as selected pilot projects with partners from industry
- Further development and coordination of our partner network
- Organization and management of internal and external project meetings
- Progress and quality control
- Presentation of project results at professional events
- Documentation of project indicators and project results

Your qualifications:

- University degree in computer science, business informatics, industrial engineering or comparable degree
- Project (management) experience in applied research, preferably related to Big Data and Artificial Intelligence
- Proven knowledge in the management of large collaborative and third-party funded projects, experience in project management methods and project management tools
- Pronounced communicative and intercultural competence, persuasiveness, willingness to travel
- Secure German and English skills

Your benefits:

- Collaboration with one of the world's leading artificial intelligence research organizations
- The opportunity to play a key role in the development of interesting Big Data and artificial intelligence research projects
- An innovative, agile and professional work environment on the pulse of technology development

We look forward to receiving your informative application documents (as one PDF-file) and your earliest possible starting date up to October 11, 2019. Please send your application with reference to the reference number given above in electronic form only to recruiting-iam@dfki.de.

The German Research Center for Artificial Intelligence (DFKI) is Germany's leading business-oriented research institution in the field of innovative software technologies based on artificial intelligence methods. In the international scientific community, DFKI ranks among the most recognized “Centers of Excellence” and currently is the biggest research center worldwide in the area of Artificial Intelligence and its application in terms of number of employees and the volume of external funds. The DFKI cooperates closely with national and international companies.

Severely disabled applicants and peers are given special consideration if they are equally suitable. The DFKI intends to increase the share of women in the field of science and therefore urges women to apply.
