To strengthen our dedicated team in the research department Interactive Textiles in Berlin we are looking for a

**Student Worker (m/w/d)**

(initially limited to 3 months)

The DRLab at the Berlin University of The Arts works on interdisciplinary design research projects that mediate the gap between technological innovations and people’s real needs. With more than twenty researchers and headed by Prof. Dr. Gesche Joost, we are exploring smart textiles, human computer interaction as well as communities in our digital society.

Your tasks:
- Development and advancement of our applications and the associated user interfaces
- Experience in visual design of an app’s UI
- Concept art and 2D-assets for a game
- Supporting the sound design for editing of sound effects and music of a game
- Supporting the development process across multiple technologies in all project phases

Your qualifications:
- Degree in interface or graphic design or a similar subject with a relevant share of specialist knowledge
- Good command of English
- Experience in illustrations for games, frame-based animation or motion comics
- Experience in designing UI for mobile apps or games
- Experience in sound design is a plus

Your benefits:
- Opportunity to work on interdisciplinary research projects at the intersection of design, electrical engineering and informatics
- Excellent equipment as well as an innovative, agile and professional working environment

We look forward to receiving your informative application documents including your earliest possible starting date.

The German Research Center for Artificial Intelligence (DFKI) is Germany's leading business-oriented research institution in the field of innovative software technologies based on artificial intelligence methods. In the international scientific community, DFKI ranks among the most recognized “Centers of Excellence” and currently is the biggest research center worldwide in the area of Artificial Intelligence and its application in terms of number of employees and the volume of external funds. The DFKI cooperates closely with national and international companies.

Severely disabled applicants and peers are given special consideration if they are equally suitable. The DFKI intends to increase the proportion of women in science and therefore expressly invites women to apply.
