The Language Technology Lab of the German Research Center for Artificial Intelligence (DFKI LT-Lab) offers a position in Berlin, Germany, as

**Software Engineer**

primarily in the areas of system development and web application development.

We are looking for people who enjoy working in an innovative and enthusiastic team, love challenges and are passionate about building clever and reliable systems and tools. We offer an excellent working environment with close integration in research projects. The successful applicant will work in a multi-disciplinary and international team in one of the world’s foremost research centers in AI and NLP. DFKI Berlin is located in the center of the dynamic, livable and affordable capital of Germany.

The candidates should have a master degree in computer science or in a related discipline.

**Expertise and experience in the following areas is expected:**

- Java development
- Web application development including HTML5, CSS3, JavaScript / jQuery, and JSON
- Strong Computer Science fundamentals (algorithms, data structures)

**Experience in these areas is a plus:**

- Natural Language Processing / Machine Learning
- Experience with web app frameworks such as Play
- Understanding of software architecture and object-oriented design

**Expected General Skills:**

- Good communication skills
- Excellent problem-solving skills
- Enjoy working as a member of a team and using their own initiative
- High degree of motivation
- Ability to manage own workload and meet deadlines
- Good organizational skills
- Good standard of written and spoken English
- Good standard of written and spoken German is helpful

**How to Apply**

Please send your electronic application (preferably in PDF format) to Dr. Feiyu Xu (feiyu@dfki.de) referring to job opening No. 19-16/HU. A meaningful application should include a cover letter, a recent CV, and a brief summary of professional interests, as well as contact information for three references.
