2. EP

3. FT

The tired baby finally
<X> and fell <Y>.

**Language Model
Pre-Training**

<X> stopped
screaming <Y>
asleep <Z>

explain classification passage:
Once upon a time I had a dog named
Toodles. He was black and
white ... query: Where was
Toodles when the duck bit his
ear? answer: On the bay

classification passage: Once
upon a time I had a dog named
Toodles. He was black and
white ... query: Where was
Toodles when the duck bit his
ear? answer: On the bay

**Explainability
Pre-Training**

False explanation: He jumped into the
pond and started swimming toward the
ducks, chasing around his new
playmates. explanation: One of the
ducks, braver than the others, poked
Toodles with his beak - and then bit him
right on one of his floppy ears!

False

**Downstream Task
Fine-Tuning**

True explanation: This conclusion was
supported by experiments that showed
that enhancing cSMAC formation reduced
stimulatory capacity of the weak peptide.

explain classification passage: T cell
activation is predicated on the
interaction between the T cell receptor
and peptide-major histocompatibility
(pMHC) ligands. ... claim: cSMAC
formation enhances weak ligand
signalling.
